LEGO Racers Build & Test Activity

Ask each class member to create a car using LEGO Bricks. Race them down the ramp. Consider what could make it faster and adapt the car each time. Once you're back in the classroom, graphs can be made from the results and you can discuss what changes could have affected the results.

Name	**Time 1**	**Time2**	**Time 3**	**Notes** *E.g. What changes helped? What went wrong?*
